

Electrostatic Disinfection Shields You from Virus

- Electrostatic Droplets
- Strong Adhesion
- Ultra-low Volume
- Super-long Endurance

About Us

As a public company operating worldwide, **Yantai Jereh Oilfield Services Group Co., Ltd.** ("Jereh Group" SZ002353) specializes in providing products, services and systematic solutions with great competitiveness and reliability in the fields of oil, gas and environmental management.

We concentrate on the challenges our customers face, which motivates us to keep cultivating our traditional areas and also to explore emerging businesses such as high-end disinfecting sprayer and intelligent environmental sanitation vehicle. Always look forwards. Never give up. Nothing is impossible is where our infinite faith lies.

Sincerity is the cornerstone on which Jereh's culture is built from day one. It underpins all the work we do. Today, more than 5,600 outstanding Jereh employees are working diligently in over 70 nations and regions. Together with our global partners, we are making a better world for all.

As a wholly-owned subsidiary of Jereh Group, **Jereh C-Create Technology Co., Ltd.** was established in 2015 with focus on R&D of automotive, intelligent and customized products. We strive to maximizing the investment returns and underlying confidence of customers with our unique R&D and innovation system.

As an innovation-driven company, we deliver smart, efficient and environmental friendly solutions with the philosophy of "Technology Makes Our Lives Better" to global customers and contribute to a better world.

Full Coverage Zero Deadzones Efficient Disinfection

360°

Fully wrap the target for complete disinfection

60dB

Less noise than conventional counterparts

40µm

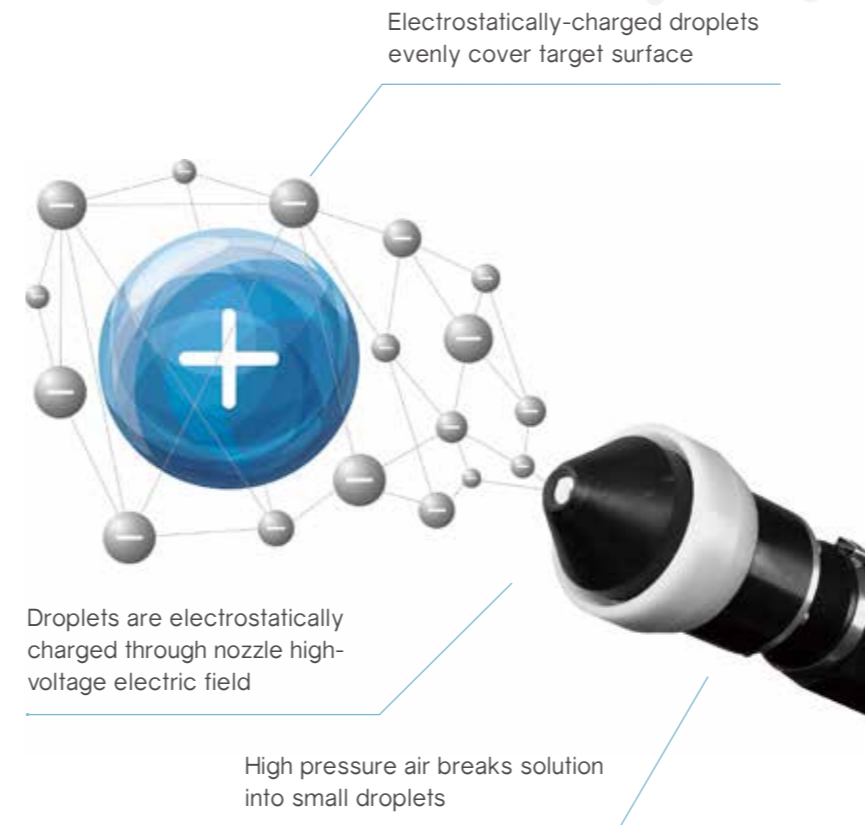

Fine and uniform droplets maximize disinfection effect

50%

Disinfectant saved by over 50%

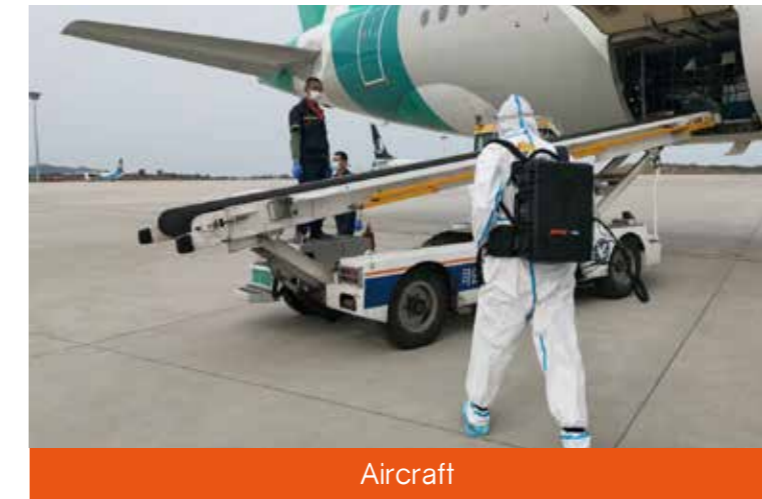

Flexible

Long endurance on a single charge

Electrostatically-charged droplets cling to target surface in 360°

Applications

Aircraft

Yacht

Shopping Mall Lobby

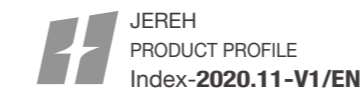

Hospital

Kindergarten

Theater

Handheld Electrostatic Sprayer

Handheld Sprayer Ready to Use Anytime

Double Effect Disinfection for A Safer Environment

- 360° Electrostatic Wrapping & Coverage for Complete Disinfection
- Addition of UV Function for Better Disinfection

500m² Coverage on A Full Bottle

- Effective Spray Distance Over 2m
- Double Wind Tunnel with Stronger Spray Power
- Handheld Design with High Flexibility

First Choice for Disinfecting Small Places and Small Areas

Description	Handheld Electrostatic Sprayer
Model	JES-HS60
Spray Distance	> 2 m
Rate	80 - 120 ml/min
Droplet Dia.	30-70 um
Power	24 V lithium battery
Dimensions	360 * 100 * 275 mm
Weight	1.9 kg (Battery included, disinfectant not included)
Bottle Volume	700 ml
Endurance	90 min

Backpack Electrostatic Sprayer

A Backpack Ready to Go

Ultra-low volume, 1L equals 10 L

- Save water and disinfectant, reduce disinfectant-adding frequency
- Not limited by external power source
- Backpack design for convenient operation and control

First choice for places with limited space and multi-compartments such as classroom, ward, office, cabin (plane & ship), vehicles, etc.

Description	Backpack Electrostatic Sprayer
Model	JES-BP18
Spray Distance	> 2 m
Rate	60 - 100 ml/min
Droplet Dia.	40 um
Power	24 V lithium battery
Dimensions	380 * 230 * 480 mm
Weight	10 kg (without battery, disinfectant not included)
Bottle Volume	1 L
Endurance	180 min

Electrostatic Disinfection Case

A Wheeled Disinfection Case

Ultra-low volume, 1 L equals 10 L

- Effective spraying width of 2.5 m
- Run continuously for 80 minutes on a single charge

First choice for disinfection/cleaning service parties with high requirements of mobility as well as the disinfection of office building, home and station, etc.

Description	Electrostatic Disinfection Case
Model	JES-SC30
Spray Distance	> 2.5 m
Rate	100 - 150 ml/min
Droplet Dia.	40 um
Power	24 V lithium battery
Dimensions	470 * 300 * 700 mm
Weight	19 kg (without battery, disinfectant not included)
Storage Capacity	5 L
Endurance	80 min

Mobile Electrostatic Disinfection Station

A Mobile Disinfection Station

Capable of continuously disinfecting a high-speed train by one operator at a time

- 20 L storage capacity
- Run continuously for 150 mins on a single charge

First choice for complicated applications such as hotel, hospital, airport, high speed train, etc.

Description	Mobile Electrostatic Disinfection Station
Model	JES-DS30
Spray Distance	> 2.5 m
Rate	100 - 150 ml/min
Droplet Dia.	40 um
Power	24 V lithium battery
Dimensions	830 * 320 * 900 mm
Weight	36 kg (without battery, disinfectant not included)
Storage Capacity	20 L
Endurance	150 min

Electrostatic Disinfection Vehicle

An Elevator Containable Electric Disinfection Vehicle

Capable of disinfecting an area of up to 60,000 m² on a single charge

- 80 L storage capacity
- Effective spraying width of 8 m
- Run continuously for 140 mins on a single charge
- Electrically-powered, elevator containable

First choice for large scale application such as airport, mall, station, etc.

Description	Electrostatic Disinfection Vehicle
Model	JES-DV330
Nozzle Qty.	10
Spray Distance	> 3.5 m (operating width > 8 m)
Rate	1.3 - 18 L/min
Droplet Dia.	40 um
Power	48 V Lithium battery
Dimensions	2,100 * 900 * 1810 mm
Weight	700 kg (with battery, disinfectant not included)
Storage Capacity	80 L
Operation Endurance	140 min
Vehicle Endurance	> 480 min
Min. Turning Radius	3.5 m
